

RAJU BATHINI

Data Analyst — Python, SQL & Data Analysis

Hyderabad, Telangana, India — rajubathini83@gmail.com — +91-818-499-4937

linkedin.com/in/raju-bathini-aa513a288 — github.com/Rajufhh

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in Python, SQL, and exploratory data analysis, gained through academic and self-directed projects involving real-world datasets. Skilled in data cleaning and validation, uncovering patterns in data, and building analytical and backend tools (Flask, REST APIs) to turn raw data into usable insights. Quick learner seeking a Data Analyst role to apply strong analytical thinking, programming, and problem-solving skills while developing proficiency in enterprise BI and reporting tools.

TECHNICAL SKILLS

Data Analysis	EDA, data cleaning, validation, profiling, anomaly detection, KNN
Languages	Python, Java, SQL
Databases	MySQL, SQLite
Tools & APIs	FastAPI, Flask, REST APIs, Git, GitHub, VS Code
Soft Skills	Communication, teamwork, time management, quick learner

PROJECTS

Face Recognition Attendance System

2025

Flask, OpenCV, SQL, KNN Classifier

- Analyzed and preprocessed real-time image data with OpenCV, applying exploratory techniques to improve face-detection accuracy – the same profiling mindset used to surface patterns and anomalies in business datasets.
- Built a KNN-based classification model to identify faces from live video input.
- Designed a Flask-based interface so staff could review and validate attendance records easily.
- Stored and queried records in SQLite, including data validation checks before writes to ensure data accuracy and reliability.

AI-Assisted Applications (Self-Project)

2025

Prompt Engineering, ChatGPT, Gemini, Lovable

- Built small AI-powered applications, including a weather app and a task manager, translating user requirements into structured, working outputs.
- Wrote and iterated on prompts (role-based, instruction-based, chained) to improve accuracy and consistency of AI-generated results.

Feedback Management System

2025

Java, OOP

- Built a menu-driven Java application to collect, structure, and manage student feedback data.
- Applied encapsulation, inheritance, and polymorphism to keep the codebase modular and easy to extend.
- Added input validation using Java Collections to keep stored data clean and consistent, supporting reliable downstream reporting.

EDUCATION

B.Tech in Computer Science & IT

2021 – 2025

Marri Laxman Reddy Institute of Technology & Management, Hyderabad

CGPA: 8.33

Higher Secondary Education

2021

Alphores Junior College, Karimnagar

92%

Matriculation

2019

TS Model School, Boinpally

CGPA: 9.2

CERTIFICATIONS

- HackerRank – Python (Basic), Java (Basic), SQL (Basic)
- Cisco Networking Academy – PCAP: Python Programming
- SmartInterviews – SmartCoder
